Senior Full-stack .NET/Angular Developer | CI/CD Automation | AI-assisted Development

📞 0855 550 200

📍 Hanoi, Vietnam

✉ dvphuong.dev@gmail.com

🎂 Date of birth: 20/07/1986

PROFESSIONAL SUMMARY

Senior Full-stack Developer with strong experience in the Microsoft ecosystem (.NET), modern frontend frameworks (Angular), and enterprise workflow automation. I can independently research, design, and implement CI/CD solutions to improve delivery efficiency. I have directly set up and operated Jenkins-based automation for key projects, built digital signature systems, PDF file-processing workflows, and secure storage integrations using Docker, SeaweedFS, and AWS S3. Recently, I have focused on AI-assisted development and automation tools.

CORE SKILLS

Software Development

- **Backend:** .NET Core, .NET MVC, C#
- **Frontend:** Angular 15-18+, TypeScript, JavaScript, jQuery, Bootstrap, HTML, CSS
- **Mobile:** Flutter (v3.10+)
- **Web:** Chrome Extensions Development

Databases

- SQL Server (2008 - 2021)
- MySQL, Oracle

Automation & DevOps

- **CI/CD:** Jenkins on Windows Automation
- **Infrastructure & Storage:** Docker, SeaweedFS container, AWS S3, PDF file transfer workflows
- **AI-assisted Development:** ChatGPT, Claude, Gemini for code review, test-case generation, refactoring support
- **Management:** Redmine, Bug Tracking, Planning
- **Testing:** Basic API Performance Testing

Languages

- **Vietnamese:** Native
- **English:** Technical Reading & Comprehension | Basic Communication | Business Email Writing

PROFESSIONAL EXPERIENCE

Senior Full-stack Developer (*DevOps Lead for .NET/Angular*)

05/2023 – 08/2025

NTSC - New Technology Solutions Software Company (VnCloud) (*Size: 70-100 employees | Hanoi*)

Project: eSign - Electronic & Digital Signature

- Developed an electronic/digital signature system serving approximately **2,000-3,000 users**, with **Microsoft account** login support in an enterprise environment.
- Designed UI screens in Figma and quickly converted designs into frontend code.
- Built key screens: Home, Dashboard, Request List, and Signing Form using **Syncfusion PDF Viewer**.
- Developed backend APIs for email delivery and **SignNow** integration.

- Implemented PDF file transfer and storage workflows from server to Docker container using **SeaweedFS**, with **AWS S3** for secure data storage needs.
- Set up **Jenkins on Windows** to run automated CI/CD for 5 projects using .NET 7 and Angular 18+.
- Performed API performance testing and resolved issues related to digital signature processing.

Tech: Figma, ASP.NET Zero, Angular 15, Syncfusion, .NET Core, SQL Server 2019, Docker, SeaweedFS, AWS S3.

Senior Full-stack Developer

2021 – 2023

NTSC - Toyota Vietnam Project (Phuc Yen) (Size: 70-100 employees | Vinh Phuc)

Project: Factory Management Systems

- Developed factory management systems serving approximately **2,000-3,000 users**, including production progress tracking, warehouse management, and parts location management.
- Handled approximately **10,000-20,000 production records**, with periodic data transfer to separate archive/reconciliation tables every few days to maintain performance and support factory operations.
- Built a **Flutter v3.10** mobile application for factory operations and workstation progress tracking.
- Migrated legacy .NET MVC projects to Angular and SQL Server 2019.
- Designed UI in Figma/Photoshop and implemented HTML for key interface screens.

Tech: ASP.NET Zero, Angular 15, Flutter v3.10, Bootstrap, SQL Server 2019.

Full-stack Developer

2015 – 2021

Toyota Vietnam Project (Phase 1) (Vinh Phuc)

- Developed factory management web applications for paint shop, welding shop, and parts warehouse operations.
- Implemented modules for unloading process, lot arrangement, and delivery to production workstations.

Tech: .NET MVC, C#, jQuery, SQL Server 2019, DevExpress.

Web Developer

2010 – 2015

Tri Nam Technology Company (Size: 50-70 employees | Hanoi)

- Developed e-commerce websites and portal systems using the DotNetNuke framework.
- Converted Photoshop UI designs into web interfaces.

Tech: DotNetNuke, C#, jQuery, SQL Server.

PERSONAL PROJECTS (2021 - PRESENT)

Algorithmic Trading Automation System (MQL5/MT5):

Developed an automated signal-processing system on MT5 using MQL5, focusing on Expert Advisor architecture, order state management, risk control, backtesting, and multi-timeframe signal confirmation logic. Used AI Agents to support strategy analysis, test case generation, and refactoring of complex logic.

Chrome Extension Development:

Developed multiple Chrome Extensions and browser automation tools for daily work: repetitive action automation, data extraction, UI augmentation on existing websites, form/action workflow handling, and internal tools to speed up operational workflows. Public example: extension for TradingView/ECMarkets. [GitHub Repository](#)

EDUCATION

Hanoi University of Industry (2006 - 2010): Information Technology - Good (GPA 7.18)

Aptech Hanoi (2010 - 2013): ACCP - Distinction
